

Short Environmental Assessment Form

Part 1 - Project Information

Instructions for Completing

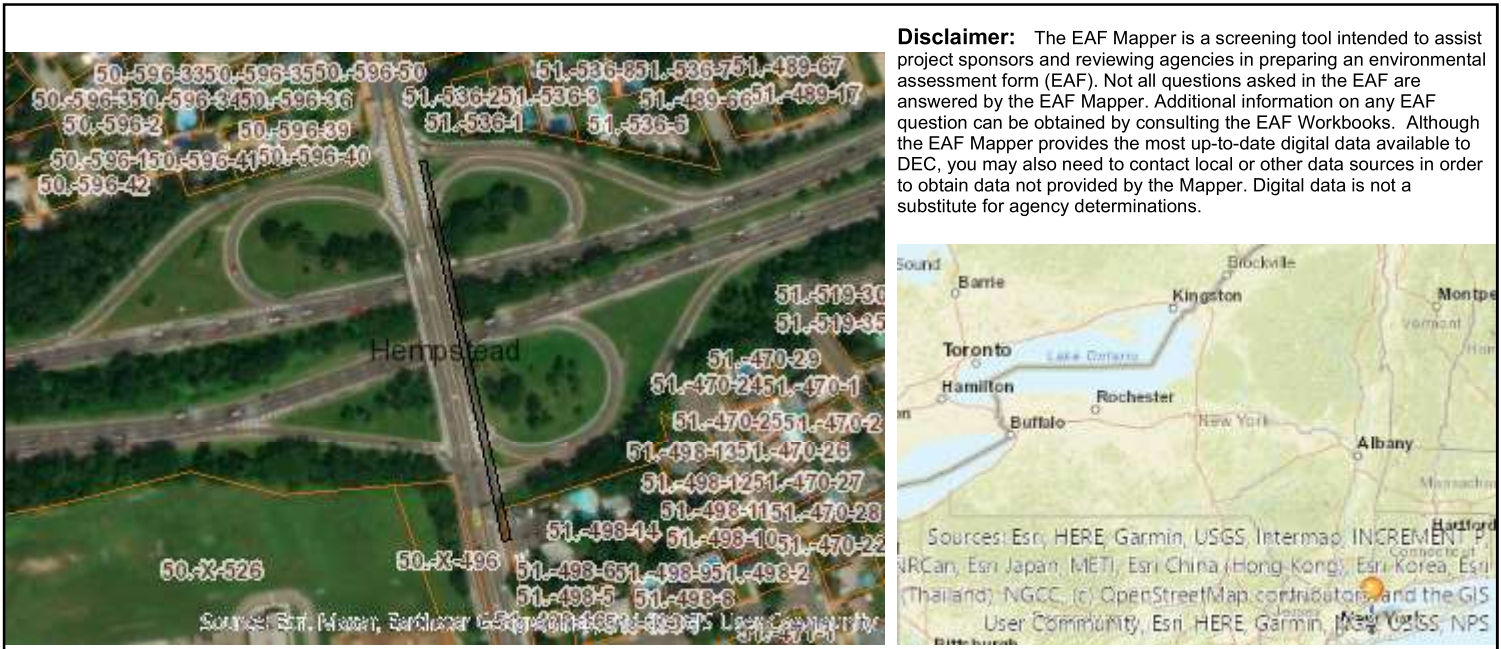

Part 1 – Project Information. The applicant or project sponsor is responsible for the completion of Part 1. Responses become part of the application for approval or funding, are subject to public review, and may be subject to further verification. Complete Part 1 based on information currently available. If additional research or investigation would be needed to fully respond to any item, please answer as thoroughly as possible based on current information.

Complete all items in Part 1. You may also provide any additional information which you believe will be needed by or useful to the lead agency; attach additional pages as necessary to supplement any item.

Part 1 – Project and Sponsor Information			
Name of Action or Project: CEM 10483 - Pole Replacement for Public Works Sign Replacement			
Project Location (describe, and attach a location map): NY-106, between Sycamore Lane and Hart Avenue, hamlet of North Bellmore, Town of Hempstead, Nassau County, New York			
Brief Description of Proposed Action: The New York State Department of Transportation (NYSDOT) is replacing a road sign above the northbound lane of NY-106 at the entrance to the westbound on-ramp for the Southern State Parkway, with its base located in the east shoulder of NY-106. The Proposed Action will require replacement of five transmission poles along the eastern side of NY-106 and one guy pole along the western side of NY-106. All poles are located between Sycamore Lane and Hart Avenue. Replacement poles will be taller poles in order to provide necessary electric clearances for the NYSDOT sign replacement. The approximate location of the Proposed Action is depicted on Figure 1. As depicted on Figure 2, the existing transmission poles range from approximately 51.5 feet to 57 feet in height. The replacement transmission poles will extend to heights ranging from approximately 64 to 65 feet above grade level (agl), with maximum height increases of 13 feet. The existing guy pole extends to an approximate height of 34 feet agl, and will be replaced with a guy pole that will extend to an approximate height of 43 feet agl. All replacement poles will be installed immediately adjacent to the existing pole locations. In total, the Proposed Action will disturb approximately 30 square feet of land consisting of concrete and grass roadside areas. No clearing of vegetation will be required. Minor tree trimming will be required for select pole installations.
